

## **DevOps Engineer – Transform the future of business relationships at ZopaAI**

**Location:** Saarbrücken/Hybrid

**About us:** ZopaAI is a dynamic start-up developing a revolutionary software solution in the field of B2B management (business-to-business). Our software offers globally active companies an AI-based system to better manage customers and build strategic partnerships in a more targeted manner. Our goal is to change the way companies interact with each other. At ZopaAI, we take an agile approach and value creativity, teamwork, and continuous development.

As a **DevOps Engineer**, you will play a key role in building and operating the scalable infrastructure that powers ZopaAI. You will work closely with our dedicated development team to ensure that our software runs reliably, securely, and efficiently.

**Tasks:** As a **DevOps Engineer**, you will:

- Setup and provisioning of Linux servers, including base services such as SSH, firewall, and monitoring agents
- Container technologies: containerization of applications and microservices with Docker, support with Kubernetes/K3s cluster management (deployments, services, ingress, troubleshooting), and creation, maintenance, and customization of Helm charts
- CI/CD & GitOps: implementation and maintenance of CI/CD pipelines with GitHub Actions (build, test, deploy) and support with GitOps workflows and deployment monitoring via ArgoCD
- Monitoring, logging, and automation: setup and maintenance of relevant tools, plus support with the development of scripts (e.g., Bash, Python)
- Security & operations: rolling out patches, managing secrets and certificates, supporting backup concepts and restore tests
- Documentation: creation and maintenance of operations and deployment documentation

### **Requirements:**

- Good German language skills (spoken and written) are a strong plus, but not mandatory
- Solid knowledge of Linux server administration and common base services
- Experience with containerization (Docker) and container orchestration (Kubernetes, K3s)
- Practical experience with Helm charts and GitOps workflows (e.g., ArgoCD)
- Knowledge of building and maintaining CI/CD pipelines (e.g., GitHub Actions)
- Confident use of scripting languages such as Bash and Python for automation

- Experience with monitoring and logging tools as well as backup and security concepts
- Independent and structured working style with strong problem-solving skills
- Excellent teamwork and communication skills, with a strong eagerness to learn
- Interest in or initial experience with information security standards (e.g., ISO 27001 / ISMS) is a plus – we plan to move in this direction over time

**Our offer:**

- Direct impact: you actively shape how our AI-driven solution is rolled out to global industry leaders
- A steep learning curve and plenty of room to take on responsibility from day one
- Mentoring and the chance to grow your skills further – including in areas such as cloud-native architecture and information security
- The opportunity to build your career in a fast-growing technology start-up with international ambitions
- Flexible working hours and home-office options
- Fair compensation and the potential for a long-term career path within the company
- A motivated, supportive, and international team that values your ideas and celebrates success together

If you want to be part of the growing team of ZopaAI, we look forward to your application. Please send your documents, including CV, earliest possible starting date and relevant references via email to [join@zopaai.com](mailto:join@zopaai.com).
